

Meet Rathod

Full Stack Blockchain Engineer

mrathod05@outlook.com • +91-9265535978 • Ahmedabad, Gujarat • [View Portfolio](#)

PROFILE

- **Senior Full Stack Blockchain Engineer** specializing in the convergence of scalable **MERN architectures** and high-performance **Rust/Move systems**.
- **Ecosystem Specialist** architecting production-grade protocols and developer tooling (SDKs) across the **Supra, Aptos, and Solana** networks.
- **End-to-End Product Ownership:** Led the full SDLC for **5+ enterprise-grade projects**, delivering both scalable **MERN platforms** and **DeFi protocols** from system design to deployment.
- **Performance Architect:** Expert in reducing on-chain gas costs via Move resource models and optimizing off-chain data indexing for millisecond-latency UIs.
- **Security-First Engineering:** Delivering formally verified smart contracts and audit-ready codebases that prioritize asset safety and reliability.

TECHNICAL SKILLS

Technical Skills

- **Blockchain & Systems:** Rust, Move (Aptos & Supra), Solana, Smart Contracts, DApp Architecture, SDK Development, Rust Scripting.
- **Backend & Architecture:** Nest.js, Node.js, Microservices, Apache Kafka, Event-Driven Architecture, NX Monorepo, WebSockets.
- **Frontend Engineering:** Next.js, React.js, TypeScript, JavaScript, Wallet Integration, State Management.
- **Data & Infrastructure:** PostgreSQL, MongoDB, Database Optimization, AWS (EC2, S3), Firebase, GraphQL.

PROFESSIONAL EXPERIENCE

Codezeros

04/2025 – Present
Ahmedabad, India

Full-Stack Blockchain Developer

- **Architected and deployed** secure smart contracts on **Aptos (Move), and Supra**, implementing complex AMM logic, custom tokenomics, and NFT standards with a focus on gas optimization.
- **Engineered hybrid Web3 architectures**, integrating rigorous on-chain state management with **MERN stack** interfaces to ensure seamless user experiences and real-time data synchronization.
- **Developed high-performance off-chain indexers** using **Rust**, creating efficient data pipelines that track on-chain events and populate PostgreSQL databases for instant UI retrieval.
- **Optimized transaction lifecycles** and secure wallet integrations, implementing robust error handling and simulation logic to drastically reduce transaction failure rates.

09/2022 – 04/2025
Ahmedabad, India

Software Engineer (MERN Stack)

- **Engineered enterprise-grade platforms** using **Next.js** and the **MERN stack**, adopting **NX Monorepo** patterns to streamline code sharing across scalable microservices architectures.
- **Orchestrated high-throughput event streaming systems** using **Apache Kafka**, enabling real-time data processing and decoupling backend services for improved system reliability.
- **Developed complex API layers** using **GraphQL** and **WebSockets**, integrating secure payment gateways (Stripe) and third-party services to support high-traffic user interactions.

PROJECTS

Supra Token Factory, A No-Code Asset Management Protocol on Supra Layer-1

- **Architected** a decentralized launchpad on the **Supra** network, bridging **Move** smart contracts with a **Next.js** frontend to enable zero-code token deployment.
- **Integrated** the **Supra L1 SDK** to manage complex wallet states and transaction serialization, ensuring secure and seamless interaction with the blockchain.

GitHub - <https://github.com/mrathod05/supra-token-factory>

Live Demo - <https://supra-token-factory.netlify.app/>

Supra Indexer SDK, A High-Performance Rust Client for Supra Blockchain Events

- **Authored** a type-safe Rust library (supra-indexer-sdk-rs) that streamlines interaction with the Supra blockchain indexer, enabling developers to efficiently query transaction history and event logs.
- **Implemented** the **Builder Pattern** to create a flexible, strongly-typed API surface, significantly improving developer experience (DX) and reducing integration errors for the ecosystem.

GitHub - <https://github.com/mrathod05/supra-indexer-sdk-rs>

Live Demo - https://crates.io/crates/supra_indexer_sdk

StakeHaven, A Comprehensive Staking Solution

- Developed a comprehensive DeFi staking platform on Aptos blockchain using Move smart contracts, enabling users to stake HavenCoin (HVC) with time-based reward calculations
- Built flexible withdrawal system and yield farming mechanisms with automated reward distribution and compound interest features

GitHub - <https://github.com/mrathod05/StakeHaven>

Sol-Next, A Solana-based NFT marketplace for managing NFTs.

- Built a Solana-based NFT marketplace for managing NFTs using Web3 technologies and seamless blockchain integration
- Developed Next.js frontend with wallet integrations and real-time NFT tracking for optimized user experience
- Implemented scalable architecture handling high-volume NFT transactions with efficient data management

GitHub - <https://github.com/mrathod05/Sol-Next>

Live Demo - <https://sol-next.netlify.app/>

EDUCATION

06/2019 – 03/2022
Ahmedabad, India

Bachelor Of Computer Applications, Shree Chimanbhai Institute

06/2017 – 03/2018
Ahmedabad, India

HSC, R.R Dwivedi Highschool
